

SAKURA
Filtration Product

Worldwide Engine Partner

FILTRATION WARRANTY

Sakura's first class quality automotive components ensure the customer will have the best choice in products that are guaranteed free of defect. The warranty covers replacement if the product is found to be defective, and the restoration of the engine to its condition before failure in the event of engine failure due to the filter. Sakura Filters are manufactured by ADR Group of Companies, a group that has been providing automotive & industrial parts solution, for the OEM, for more than 35 years.

With over 5,000 products available, Sakura offer the largest global range of automotive, heavy duty & commercial filter products - including American, European & Asian applications.

Sakura is established as a leading provider of OEM' (original equipment manufacture) solutions to the worldwide automotive, commercial, heavy equipment, and industrial sectors.

Sakura filters are designed and manufactured in accordance to SAE, JIS and DIN standards, to meet efficiency, life expectancy, vibration, impulse, and other standard industry criterias.

Sakura Filters and other ADR Group manufactured products are ISO/TS complaint. All the products are tested to the ISO/IEC 17025:2005 standard at accredited laboratories.
